

Walk-Behind Concrete Power Trowel

This walk-behind concrete power trowel is designed for smoothing and finishing concrete surfaces. It features a gasoline engine, a rotating blade assembly enclosed within a safety cage, and a long handle for operator control.

Product Overview

Professional Concrete Finishing

This walk-behind concrete power trowel is engineered for high-performance smoothing and finishing of concrete surfaces. Featuring a robust gasoline engine and a precision-engineered rotating blade assembly, it delivers a level, professional-grade finish on slabs, patios, and flooring. Designed with operator safety in mind, the unit includes a protective safety cage to ensure secure operation on busy job sites.

Technical Specifications

Engine Type	Gasoline
Operation	Walk-behind
Safety Features	Safety Cage, Operator Control Handle

Applications

Suitable Applications

- Concrete slab finishing
- Patio smoothing
- Sidewalk leveling
- Industrial floor finishing
