Overview

Robust power trowel designed for professional concrete smoothing and leveling.

Professional Concrete Finishing

This walk-behind power trowel is a robust, heavy-duty machine engineered for superior concrete finishing. Designed for both small and large projects, it features a reliable gasoline engine, precision blade adjustment, and an over-built gearbox for extended service life. With adjustable handle heights and built-in safety mechanisms, it offers both operator comfort and essential protection during demanding construction tasks.

Technical Specifications

Detailed view of the power trowel components, safety features, and technical specifications.

Performance Metrics

4 kW

Power Output

5.5 hp

Power Output

Rotor Diameter	91 cm
Guard Diameter	94 cm
Operating Mass	90 kg
Blade Speed Range	80-100 rpm

Features

Compatible Accessories

- Finishing blades
- Combination blades
- Trowel pans

Key Features

Adjustable handle height, Centri-safety switch, Lifting tube included, Screw blade adjustment, Over-built gearbox
