

Walk-Behind Concrete Saw

This walk-behind concrete saw is designed for cutting concrete, asphalt, and other hard materials. It features a robust frame with wheels for easy maneuverability and an internal combustion engine.

Product Overview

Professional Walk-Behind Concrete Saw

This walk-behind concrete saw is engineered for high-performance cutting in concrete and asphalt applications. The machine features a robust, maneuverable frame equipped with wheels to ensure stability and ease of movement on job sites. Designed with operator ergonomics in mind, it includes adjustable handles and a integrated water tank system for effective dust suppression during heavy-duty operations.

Key Features

Operating Advantages

- Integrated water tank for dust suppression
- Adjustable handles for operator comfort
- Durable blade guard for safety
- Robust frame for structural stability
- Wheeled chassis for smooth site maneuverability

Application

Suitable Materials

Concrete, Asphalt, Hard Materials

Technical Specs

Power System

Internal combustion engine
