

Walk-Behind Gasoline Tiller

This walk-behind tiller is designed for soil preparation in gardens and small farms. It features a gasoline-powered engine connected to rotating tines to break up and aerate the soil.

Product Overview

Professional Soil Preparation

This walk-behind gasoline tiller is engineered for efficient soil preparation in gardens and small to medium-sized farms. Featuring a robust metal frame and a reliable air-cooled engine, it provides the necessary power to break up and aerate soil effectively. With adjustable handlebars for enhanced operator control and maneuverability, this machine is a practical solution for demanding agricultural tasks.
