

Walk-Behind Power Trowel

This walk-behind power trowel is designed for finishing concrete surfaces. It features a gasoline engine, a rotating trowel head enclosed by a safety cage, and a long handle for operator control.

Overview

Professional Concrete Finishing

This walk-behind power trowel is engineered for high-quality concrete surface finishing. Featuring a reliable gasoline engine and a robust rotating trowel head, it is designed to create perfectly smooth and level concrete floors and slabs. The ergonomic handle ensures precise operator control, while the integrated safety cage provides essential protection during operation.

Technical Specifications

Engine Type	Gasoline (Four-Stroke)
Safety Features	Safety Cage, Operator Control Handle
Primary Application	Concrete floor and slab finishing
Operation	Walk-behind
