

Walk-Behind Snow Clearing Machine with Adjustable Chute

This walk-behind machine is designed for clearing snow from driveways and walkways. It features a 20-inch clearing width and an adjustable chute for directing snow discharge.

Product Overview

Professional Snow Clearing Efficiency

This high-performance walk-behind snow clearing machine is engineered for reliability on residential driveways and commercial walkways. Featuring a 20-inch clearing width and a robust auger system, it efficiently displaces heavy snow accumulation. The unit includes an adjustable discharge chute for precision control, ensuring snow is cleared exactly where needed.
