

Walk-Behind String Trimmer

This walk-behind trimmer utilizes a high-speed rotating nylon rope for cutting grass. Its steel front shield provides enhanced safety during operation.

Overview

Professional Landscaping Performance

The LM075 walk-behind string trimmer is designed for high-efficiency maintenance of overgrown areas and turf. Powered by a 5HP gasoline engine, it offers robust cutting performance across diverse terrains. Its balanced design and large-wheel configuration ensure maneuverability for both residential and commercial landscaping tasks.
