

Walk-Behind Tractor with Tilling Attachments

This walk-behind tractor is a versatile piece of agricultural machinery designed for various tasks in farming and landscaping. It features a robust engine, a sturdy frame, and a set of tilling attachments.

Product Overview

Versatile Agricultural Machinery

This walk-behind tractor, also known as a two-wheel or single-axle tractor, is a highly versatile piece of equipment designed for diverse farming and landscaping tasks. Featuring a robust single-cylinder, four-stroke gasoline engine, it provides the consistent power required for efficient tilling, plowing, and soil preparation. With adjustable handlebars and reliable pneumatic tires, it ensures operator comfort and excellent traction across various terrains.

Technical Specifications

Engine Type	Single-cylinder, four-stroke gasoline engine
Transmission System	Multi-speed forward and reverse
Tire Type	Pneumatic tires

Key Features

Operational Features

- Adjustable handlebars for operator control
- Robust frame construction
- Includes tilling attachments
- Excellent traction on diverse terrain

Applications

Suitable Applications	Small-scale farming, Medium-scale farming, Gardening, Landscaping, Soil preparation
