Product Overview

Professional Agricultural Brush Cutter

This walk-behind wheeled brush cutter is a versatile, professional-grade solution designed for efficient weeding in paddy fields and garden maintenance. Engineered with a compact and lightweight frame, it offers exceptional maneuverability while effectively loosening soil to prevent hardening. Featuring a multi-functional design with interchangeable heads, it serves as an essential, economical tool for modern rice planting and agricultural operations.

Technical Specifications

Engine Type	2-Stroke Gasoline Engine
Model Identifier	WP-10ES
Engine Model	139F

Key Features

Functional Capabilities

- Weeding for paddy fields
- Garden soil cultivation
- Rotary hoeing
- Soil aeration
- Brush clearing
- Vegetation trimming

Design Highlights

Lightweight, Compact Body, Easy Maneuverability, Economical, Ergonomic Handles

Safety & Operation

Safety Equipment

Protective Guard • Emergency Shut-off Switch
