Product Overview

A 6-row walking rice transplanter designed for efficiency and ease of operation.

Professional Rice Transplanting Solution

This walking-type rice transplanter is a compact, high-efficiency machine engineered for small to medium-sized farms. Available in 4-row and 6-row configurations, it significantly reduces manual labor while ensuring precise seedling spacing and planting depth. Designed for durability and ease of operation, it is an ideal solution for optimizing planting density and improving overall harvest consistency.

Technical Specifications

Close-up of the mechanical planting arms and seedling trays.

Engine Power

3.3 kW

Engine Output

Row Configuration

4-row • 6-row

Model Series

2ZS-630S

Key Features

Operational Advantages

- Easy to operate in various field conditions
- Adjustable planting depth and row spacing
- Durable construction for long-term reliability
- Precision seedling feeding mechanism
- High maneuverability in paddy fields

After-Sales Support

Warranty Coverage

1-year warranty with free replacement parts for quality-related issues.
