

Walking Tractor for Agriculture

This walking tractor is a versatile agricultural machine designed for plowing and tilling land. Its compact size and maneuverability make it suitable for use in small to medium-sized farms.

Overview

Versatile Agricultural Performance

The DF-8 Walking Tractor is a robust agricultural machine engineered for efficient plowing, tilling, and cultivating. Designed for small to medium-sized farms, it combines a powerful engine with durable traction tires to handle varied soil conditions reliably. Its compact frame and adjustable handle system ensure high maneuverability and operator comfort during extended use.

Technical Specifications

Key Features

- Robust engine performance
- Durable high-traction tires
- Adjustable operator handles
- Integrated rotary tillers
- Sturdy frame construction

Model Identifier	DF-8
Primary Applications	Plowing, Tilling, Cultivating
