

Walking Tractor for Agriculture

This walking tractor is a versatile agricultural machine designed for various farming tasks. It features a robust engine, typically a single-cylinder diesel, providing ample power for tilling, plowing, and other soil preparation activities.

Overview

Versatile Agricultural Power

The DF-12L walking tractor is a robust and versatile agricultural machine engineered for small to medium-sized farms. Equipped with a reliable single-cylinder diesel engine, it provides consistent power for essential tasks like tilling, plowing, and soil preparation. With its ergonomic design and adjustable handlebars, it ensures operator comfort while delivering a cost-effective solution for diverse farming needs.

Performance
