Product Overview

Versatile Walking Tractor

The GN-121(S195G) is a robust walking tractor designed for diverse agricultural applications including plowing, tilling, and planting. It features a reliable single-cylinder diesel engine and a sturdy frame engineered for maneuverability in tight spaces and rugged field conditions. With adjustable handles and efficient power transmission, this machine provides an essential solution for mechanizing heavy workloads on small to medium-sized farms.

Technical Specifications

Engine Power

7 HP

Power Output

Hydraulic Performance

Metric	Value
Pressure	2200 PSI
Flow Rate	2.5 GPM

Article Number

GN-121(S195G)

Key Features

Design Features

- Single-cylinder diesel engine
- Adjustable handles for operator control
- Durable frame for rugged terrain
- Compact maneuverability

Applications

Plowing, Tilling, Planting, Harvesting
