

Wall Cladding and Siding Panel Roll Forming Machine

This roll forming machine manufactures wall cladding sheets and siding panels. The heavy-duty machine shapes metal using rollers and includes an electrical control panel.

Product Overview

Industrial Roll Forming Solution

This high-performance roll forming machine is engineered for the efficient production of steel roof and wall panels, catering to diverse construction requirements from warehouses to gymnasiums. Featuring a robust 5.5kw power system and 17 roll stations, it delivers high-strength, lightweight building materials with precision. Designed for ease of installation and short building cycles, it provides a professional solution for modern steel construction projects.

Technical Specifications

Main Motor Power

5.5 kw

Main Motor

5.5 kw

Hydraulic Engine

Roll Stations	17
Making Speed	10 m/min
Effective Width	1000 mm

Machine Dimensions

Physical Dimensions (L*W*H)	8.5m x 0.8m x 2.3m
-----------------------------	--------------------

Operational Details

Control System	PLC with Touch Screen
Voltage	380V
Production Capacity	30 sets/month

Compliance and Service

After-sales Support
Engineers available for overseas service

Certifications	ISO9001
Warranty	1 year
