

Wall Cladding Roll Forming Machine

This roll forming machine is designed for manufacturing wall cladding panels. The robust machine ensures precise and efficient production of various cladding profiles.

Overview

High-Efficiency Wall Cladding Production

This industrial-grade roll forming machine is engineered for the precise manufacturing of steel wall cladding and roof panels. Designed for high-volume environments, it achieves a production speed of 10 meters per minute to ensure consistent operational efficiency. With a robust 5.5kw motor, this equipment is built to deliver durable construction materials for large-scale steel building projects.

Technical Specifications

Key Performance Metrics

5.5 kw

Power Output

10 m/min

Production Speed

Machine Dimensions

6600 x 1400 x 1300 mm

Voltage

380V, 3 Phase

Compliance and Service

Service Details

- 1-year warranty included
- Engineers available for overseas service
- New condition equipment

Certifications

BV Certified

Operational Details

Application

Roof Panel • Wall Cladding
