

Wall Groove Cutter

The wall groove cutter is a power tool for creating precise grooves in walls. It is designed for cutting concrete, brick, and masonry, and features adjustable cutting depth and width.

Product Overview

Professional Masonry Groove Cutting

The Wall Groove Cutter is a high-performance power tool engineered for precision channeling in concrete and brick masonry. With a powerful 2400W motor, it ensures consistent results for demanding construction tasks like electrical conduit installation and plumbing. Its ergonomic design and integrated dust extraction system prioritize both operator comfort and a safer, cleaner job site environment.
