

# Wall Grooving Machine

This wall grooving machine is a specialized power tool for creating precise grooves in walls made of concrete, brick, or masonry. It features an adjustable cutting depth mechanism and a dust extraction port for a cleaner working environment.

## Product Overview

### Professional Wall Grooving Solution

The KCS150P wall grooving machine is engineered for precision masonry work, delivering clean and accurate channels in concrete, brick, and other hard materials. Equipped with a powerful 2400W motor, this tool provides the performance necessary for high-demand electrical and plumbing installations. Its ergonomic build, integrated dust management, and adjustable cutting parameters ensure both operator comfort and professional-grade results.

## Technical Specifications

### Rated Power

**2400 W**

Power Input

### Cutting Performance

Parameter	Value
No-load speed	8000 RPM
Blade diameter	150 mm
Cutting depth	8-43 mm
Max cutting width	26 mm

## Features

### Key Features

Adjustable depth, Dust extraction port, Overload protection, Ergonomic handle

## Application

### Common Applications

- Electrical conduit installation
- Plumbing pipe embedding
- Decorative masonry wall grooving
