

# Wall Mount Fan with Remote Control Option

This wall fan offers three wind settings, including strong, medium, and soft, and features an optional timer. The fan has a 43cm diameter grill and a copper motor with thermal overload protection.

## Product Overview

### Professional Indoor Air Circulation

This wall-mounted electric fan is engineered for efficient air circulation in homes, offices, and commercial indoor environments. It features a robust multi-blade design encased in a protective safety grill, offering both reliability and user safety. With its space-saving wall-mount configuration and adjustable pivoting head, this unit provides customizable airflow exactly where you need it most.
