

# Wall Mount Network Cabinet

This wall mount network cabinet is designed to house and protect network equipment. It offers a space-saving solution for mounting equipment on walls and includes adjustable mounting rails and ventilation slots.

## Product Overview

### Professional Wall Mount Network Solution

The WM Series Wall Mount Network Cabinet provides a robust and secure enclosure for organizing small to medium-sized network infrastructure. Designed with a focus on space efficiency, it mounts directly to walls to conserve floor space while ensuring equipment is protected and accessible. With integrated ventilation and adjustable rails, it offers a reliable thermal and mounting environment for mission-critical networking gear.

## Key Features

### Core Features

- Secure locking door for restricted access
- Adjustable mounting rails for flexible equipment depth
- Integrated ventilation slots for optimal airflow
- Compact wall-mount design

## Design

### Mounting Configuration

Wall Mount, Secure Enclosure
