

# Wall Mount Network Cabinet

This wall mount network cabinet is designed to house and protect network equipment. Features include a lockable door for security, ventilation for temperature control, and adjustable mounting rails for flexible equipment placement.

## Product Overview

### Professional Wall Mount Network Solution

This wall-mounted network cabinet is expertly engineered to house and protect critical networking equipment in space-constrained environments. It features a robust lockable door for enhanced security, integrated ventilation systems to ensure optimal operating temperatures, and fully adjustable mounting rails for flexible equipment installation. Designed specifically for small to medium-sized network setups, it offers a reliable and secure infrastructure solution.

## Design and Build

Mounting Type	Wall Mount
Security	Lockable Door, Equipment Protection
Thermal Management	Integrated ventilation for temperature control
Rail Adjustability	Yes

## Application

### Ideal For

- Small network installations
- Medium network installations
- Office equipment housing
- Space-constrained environments
