Product Overview

High-Performance Satellite Solution

This wall-mount satellite dish antenna is engineered for reliable signal reception, specifically optimized for KU-band satellite systems. Constructed from durable, powder-coated steel, it offers excellent weather resistance and stability for both residential and commercial outdoor installations. The versatile mounting system allows for precise adjustments in elevation and azimuth, ensuring optimal signal clarity and minimal interference.

Compatibility & Performance

Compatible Receivers	KU60, KU65
Frequency Band	KU-band

Construction & Durability

Material	Powder-coated steel
Weather Resistant	Yes
Finish Color	White

Mounting & Installation

Adjustable Angles

- Elevation
- Azimuth

Included Components

Component
Mounting Brackets
Curved Support Arm
Vertical Support Pole
Base Plate
Hardware Kit (Bolts, Nuts, Screws)

Mounting Type

Wall Mount
