

Wall-Mountable Reverse Osmosis Water Filter System

This wall-mountable water purification system utilizes reverse osmosis to produce clean water. It is designed with a multi-stage filtration process and a digital display.

Product Overview

Professional Reverse Osmosis Purification

The WQH-RO wall-mountable water filter system is engineered to provide high-quality purified drinking water for both residential and commercial settings. It utilizes an efficient multi-stage reverse osmosis process to effectively remove contaminants from standard tap water. With a compact design and reliable performance, this system ensures a steady output of clean water while maintaining energy efficiency.

Technical Specifications

Daily Purification Capacity

189 L/24h

Total Quantity

Electrical Requirements

- Voltage: 220 V
- Frequency: 50 Hz
- Power: Rated for standard operation

Operating Conditions

Temperature and Pressure Ranges

Parameter	Value
Environment Temp	4°C - 40°C
Water Temp	5°C - 38°C
Water Pressure	0.1 MPa

Physical Attributes

Available Color Schemes	Green, Silver, Blue
Packing Dimensions	430 x 235 x 530 mm
