

Wall-Mountable Water Purification System

This wall-mountable water purification system provides purified water on demand. It features an electronic display and dispensing mechanism.

Product Overview

Professional Water Purification System

The Wall-Mountable Water Purification System provides a robust solution for high-quality tap water filtration. Featuring an advanced multi-stage filtration process and an intuitive LED display, it ensures reliable and safe water output for daily needs. Its space-saving wall-mounted design makes it an ideal fit for modern kitchen or utility environments.

Technical Specifications

Model	CJ-1
Water Source	Tap water
Water Pressure	0.2-0.5 Mpa
Filter Precision	0.0001 μ

Performance Metrics

Outflow Rate

2.5 L/min

Outflow Rate

Physical Dimensions

Unit Dimensions	368 x 135 x 480 mm
-----------------	--------------------

Logistics

Carton Configuration	4 pieces per carton
----------------------	---------------------

Filtration System

Filter Components

- PP
- Carbon fiber
- RO
- Post-AC
- PE

Features

Display Type

LED Display
