

Wall-Mounted Air Curtain

Wall-mounted air curtain designed for commercial or industrial use. It features a front air intake grille and adjustable airflow direction with a control panel for settings adjustments.

Product Overview

Professional Air Curtain Solution

This wall-mounted air curtain is engineered for high-performance climate control in commercial and industrial environments. Featuring a robust metal housing, it effectively separates indoor and outdoor environments, reducing energy loss through open doorways. The unit includes an adjustable airflow system and a user-friendly control panel to ensure optimal temperature management and air circulation.

Technical Specifications

Mounting Style	Wall-mounted
Ideal Application	Commercial, Industrial, Entranceways
Housing Material	Durable Metal

Features

Airflow Features

- Adjustable airflow direction
- Front air intake grille
- Integrated control panel

Core Benefits

Energy Efficient • Temperature Control • Easy Operation
