

Wall-Mounted Electric Boiler for Home Heating

This wall-mounted electric boiler provides efficient heating with quiet operation. It features a durable stainless steel pipe and an intelligent PCB control system.

Overview

Efficient Wall-Mounted Electric Heating

This wall-mounted electric boiler provides a clean, efficient, and environmentally friendly solution for home and commercial heating. Designed with a compact footprint and reliable German-engineered components, it offers a versatile alternative to gas-based systems. The unit features intelligent PCB control with a large display, ensuring ease of use, while robust safety measures like child locks and automatic protection systems provide peace of mind.

Technical Specifications

Power Output Range

- 8
- 16

IP Rating

IPX4

Maximum Pressure

3 Bar

Maximum Temperature

85 °C

Electrical Requirements

220V-240V, 50Hz/60Hz

Design Life

15 years

Features & Safety

Safety Components

- Overheat protection
- Leakage protection coil
- Safety relief valve
- Water pressure gauge

Key Features

Intelligent PCB Control, Child Lock, Compact Design, Low Noise Operation

Components

Main Components

- Grundfos water pump
- Expansion tank
- Solid alloy heating element
- Temperature-controlled sensing probe
