

Wall-Mounted Gas Boiler with LCD Display

This wall-mounted gas boiler provides domestic hot water and heating. It features a neat design, gas-saving technology, and an LCD display.

Product Overview

High-Efficiency Residential Heating

This wall-mounted gas boiler provides reliable domestic hot water and heating solutions through a compact, water-tube design. Featuring an intelligent management system with an LCD interface, it offers precise temperature control and specialized energy-saving modes. Designed for versatility, the unit supports various capacity and exhaust configurations to suit diverse residential installation needs.

Technical Specifications

Available Input Capacities

- 20 kW
- 27 kW

Configurable Models

Category	Options
Exhaust	Open Chamber (Air Draught) / Closed Chamber (Forced Exhaust)
Heat Exchanger	Pipe (Single) / Plate (Double)

System Type	Water Tube, Natural Circulation, Low Pressure
--------------------	---

Features

Performance & Efficiency

1 °C Temperature Accuracy	80 % Sleeping Mode Energy Reduction
-------------------------------------	---

Key Features

Digital LCD Display • Intelligent Management • Silent Sleeping Mode • High Efficiency Combustion • Environmental Protection
