

Wall-Mounted Half-Condensing Gas Boiler

This wall-mounted gas boiler features a double heat exchange system. Its design includes an antiseptic paint coat for environmental protection and high efficiency.

Product Overview

High-Efficiency Heating Solution

This wall-mounted half-condensing gas boiler combines advanced European technology with reliable performance for domestic heating and hot water needs. Featuring a 98% heat efficiency rating, it is designed for significant energy savings while maintaining a compact, vertical footprint. Equipped with microcomputer control and intuitive LED interfacing, this system provides precise temperature management and comprehensive safety protections for peace of mind.

Technical Specifications

Rated Power Output

24 kW

Power

Heat Efficiency	98 %
Fuel Source	Gas-fired
Boiler Structure	Water Tube
Circulation	Natural Circulation

Key Features

Safety Functions

- Multiple safety protection function
- Automatic resume operation
- Microcomputer brainpower control
- Digital accurate temperature control

Performance Highlights

Super Quiet Combustion • Low Emission • Antiseptic Paintcoat

Certifications	CE Certified, Energy Saving
