

Wall-Mounted Infrared Bathroom Heater with Ventilation Fan

This wall-mounted heater is equipped with four infrared lamps for efficient heating. It also features a central ventilation fan and a tilting mechanism to direct heat.

Overview

Efficient Bathroom Climate Control

This wall-mounted infrared bathroom heater is engineered for rapid and efficient warming of bathroom environments during colder months. The unit combines four high-performance infrared heating lamps with a central ventilation fan, ensuring both immediate thermal comfort and effective air circulation. Designed with a convenient tilting mechanism, it allows users to direct heat exactly where it is needed most.
