

Wall-Mounted Interphone with Camera

This is a wall-mounted interphone with a camera for secure communication. The device ensures clear audio and video transmission for access control and internal communication needs.

Overview

Professional Communication Solution

This wall-mounted interphone is designed for secure, reliable communication in access control environments. Featuring an integrated camera, it provides both audio and visual verification for enhanced security. Its compact, wall-mounted design with a traditional handset ensures ease of use and clear, private conversations.
