

Wall-Mounted PTC Heater

This wall-mounted PTC heater provides efficient and safe heating. The heater features a compact design and utilizes PTC heating elements for self-regulating temperature.

Overview

Efficient PTC Heating Solution

This wall-mounted PTC heater is engineered for reliable and efficient thermal performance in diverse environments. Utilizing advanced Positive Temperature Coefficient technology, it features self-regulating temperature control to inherently prevent overheating. Its compact, wall-mounted design ensures it is a versatile choice for supplemental heating in residential, commercial, and industrial settings.

Technical Specifications

Heating Technology	Positive Temperature Coefficient (PTC)
Mounting Type	Wall-mounted
Safety and Performance Features	Self-regulating temperature, Overheat prevention, Energy efficient, Compact design

Application

Recommended Environments

- Residential spaces
- Commercial offices
- Industrial facilities
