Overview

Advanced Climate Control

This wall-mounted residential air conditioner is engineered for efficient and quiet climate management in modern living spaces. It features advanced air quality monitoring, including CO2 concentration detection and photosensitive sensing technology for optimized performance. With dual concealed air guide louvers and two-way air circulation, the unit ensures consistent cooling and heating distribution throughout the room.

Key Features

Core Technologies

CO2 Concentration Detection, Two-way Air Circulation, Photosensitive Sensing, Dual Concealed Louvers
