

Wall-Mounted Reverse Osmosis Water Purifier

This wall-mounted water purifier is designed for household use and features a digital display. It utilizes a multi-stage filtration system with reverse osmosis (RO) technology to purify tap water.

Overview

Professional RO Purification

This wall-mounted reverse osmosis water purifier is designed to provide high-quality drinking water for residential environments. It features advanced RO technology integrated into a compact, space-saving design that is easy to install. With an electronic control panel, users can monitor filter health and operation with ease while ensuring consistent water safety.

Performance Metrics

Daily Purification Capacity

189 L/24h

Daily Output

0.13 ml/min

Flow Rate

Technical Specifications

Operating Parameters

Parameter	Range/Value
Water Pressure	0.1-0.1 MPa
Environment Temp	4-40 °C
Water Temp	5-38 °C
Voltage	220 V
Frequency	50 Hz

Installation Details

Packing Dimensions	430 * 235 * 530 mm
--------------------	--------------------

Compliance

Key Features	Reverse Osmosis, Wall-Mounted, Electronic Control, Compact Design
