

Wall-Mounted Vertical Window Air Conditioner

This wall-mounted air conditioner is designed for vertical window installation. It features cooling, fan, and dehumidifying functions with adjustable fan speeds and a programmable timer.

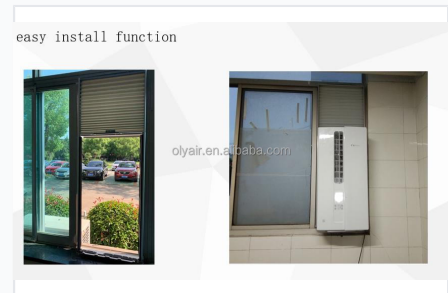

Overview

Sleek vertical design that integrates seamlessly into wall and window spaces.

Compact dimensions allow for versatile installation in bedrooms, living rooms, and offices.

Designed for easy, space-efficient window installation.

Versatile Vertical Cooling Solution

This wall-mounted, built-in vertical window air conditioner offers a space-saving design perfect for residential and commercial applications. Engineered with a self-evaporating condensate system, it eliminates the need for an exhaust hose, ensuring a cleaner installation. The unit provides efficient 3-in-1 functionality, including cooling, fan, and dry modes, supported by a dual-motor system that includes a quiet DC motor.

Performance & Capacity

Efficient airflow design with front air intake and rear hot air exhaust.

Key Performance Metrics

320 m³/h Max Air Circulation	20 m² Max Application Area
---	---

Available Cooling Capacities

5000 BTU, 6000 BTU, 6500 BTU, 7000 BTU, 8000 BTU

Technical Specifications

most platform for portable AC in the market

install parts for different dimension Windows

Includes adjustable installation parts to fit various window dimensions.

Electrical Requirements

- 220-240V / 50Hz
- 220V / 60Hz
- 110-120V / 60Hz

Refrigerant

R410A

Features & Controls

Key Features

Self-Evaporating • 3-in-1 Function • Auto Swing • Sleep Mode • 24Hr Timer • Power Failure Memory

Control & Operation

- Integrated Remote Control
- 3-Speed Wind Adjustment
