

Wall/Window Evaporative Air Cooler with 6800 cmh Airflow

This evaporative air cooler is designed for wall or window installation, offering flexible placement options. It provides a silent cooling effect, capable of reducing temperatures by 4°C to 10°C.

Product Overview

Versatile Evaporative Cooling

This wall and window-mounted evaporative air cooler offers a compact and lightweight design, ensuring flexible installation options for various spaces. It provides an excellent cooling effect, capable of reducing ambient temperatures by 4°C to 10°C, all while maintaining silent performance. Built with ease of maintenance in mind, the unit features integrated dust and insect-proof protection.

Performance Specifications

Airflow Capacity

6800 cmh
Airflow

Cooling Range

4°C ~ 10°C

Features and Controls

User Interface

- Durable touch panel
- Compact lightweight remote control

Key Features

Dust-proof, Insect-proof, Silent operation, Wall-mountable, Window-mountable

Installation and Maintenance

Maintenance Design

Simplified assembly and disassembly with protective barriers against insects and dust.
