

Warehouse Platform Truck

This platform truck is designed for warehouse goods transportation. It features a steel frame and swivel casters for durability and maneuverability.

Product Overview

Industrial Warehouse Platform Truck

This industrial-grade platform truck is engineered for efficient and safe goods transportation in demanding warehouse environments. It features a robust, knock-down structure that simplifies transportation and storage, alongside a specialized caster system designed for quick and easy assembly. With integrated locking drawers and a stable platform, this unit provides a reliable solution for moving heavy or bulky items securely.
