

Warehouse Trailing Steel Cart

This steel cart is designed for efficiently trailing goods within a warehouse. It features a robust, welded steel frame with a grid-like structure and durable casters.

Product Overview

Industrial Warehouse Trailing Cart

This robust warehouse trailing cart is engineered for efficient material handling and transport in industrial environments. Featuring a knock-down design, it allows for easy transportation and compact storage when not in use. The structure includes integrated locking drawers and a specialized caster assembly system for rapid deployment.
