

Washing Machine Agitator Shaft

This agitator shaft is designed for use in washing machines. It facilitates the agitation or spinning functions within the appliance.

Product Overview

Professional Grade Agitator Shaft

The WJ-258 P-shaft is a precision-engineered component essential for the operational integrity of washing machine agitation and spinning systems. Designed to endure high mechanical stress and demanding internal environments, this shaft ensures reliable performance and longevity. Its robust construction incorporates specialized flanged and cylindrical sections to facilitate secure bearing support and component integration.

Technical Specifications

Model Number	WJ-258
Component Type	Agitator P-Shaft

Design Features

Construction Elements

- Cylindrical body
- Flanged sections for bearing support
- Threaded coupling zones

Key Features	Reinforced Structure, Corrosion Resistant, Precision Machined, Integrated Mounting
Mounting Method	Threaded/Bolt-on
