

Washing Machine Clutch Assembly

This clutch assembly is designed for use in washing machines and similar appliances. It features a metallic housing, central shaft with rubber seal, and gear mechanism.

Product Overview

Washing Machine Clutch Assembly

This washing machine clutch assembly is engineered for reliable performance in appliance drive systems. It features a precise speed reduction scale of 1:5 and is designed to support a load capacity of 4.5KG. With robust construction and specific spline dimensions, it ensures efficient rotational power transfer and engagement control.

Technical Specifications

Speed Reduction Scale	1:5
Wave Wheel Spline Size	9x9x11
Inner Gear Modulus	1
