

# Washing Machine Clutch Assembly

This clutch assembly is designed for washing machines and similar appliances. It features a metallic housing, central shaft, and pulley system for belt-driven operation.

## Product Overview

### Washing Machine Clutch Assembly

This high-quality clutch assembly is designed for efficient power transmission in washing machine applications. Featuring a robust metallic construction, it ensures durability and resistance to wear during demanding operation cycles. Its precise engineering, including a 1:5 speed reduction scale and specific gear modulus, makes it a reliable replacement or component for maintaining optimal appliance performance.

## Technical Specifications

Speed Reduction Scale	1:5
Inner Gear Modulus	1
Wave Wheel Spline Size	1M×45R×10Z

## Performance Metrics

### Suitable Clothes Weight

**4.5 KG**

Capacity
