

Washing Machine Control Boards

Control boards for washing machines. These boards manage the functions of washing and drying machines, controlling water levels, motor speeds, heating elements, and cycle timing.

Product Overview

Professional Control Board Solutions

These advanced control boards are specifically engineered to manage complex washing and drying machine operations. They provide precise regulation of critical functions, including water level sensing, motor speed modulation, heating element activation, and cycle timing sequences. Designed for durability and performance, these components ensure optimal appliance functionality across various operational cycles.

Technical Specifications

Model Variants

- HITACHI-27
- HITACHI-28
- HITACHI-29
- HITACHI-30
- HITACHI-31
- HITACHI-32
- HITACHI-33
- HITACHI-34
- HITACHI-35
- HITACHI-36
- HITACHI-37
- HITACHI-38
- HITACHI-39
- HITACHI-40
- HITACHI-41
- HITACHI-42

Integrated Components

Capacitors • Resistors • Integrated Circuits • Connectors

Core Functions

Water Level Control, Motor Speed Management, Heating Element Regulation, Cycle Timing
