Product Overview

Robust Drum Support Solution

This high-quality washing machine and clothes dryer drum support spider is engineered to connect the inner drum to the drive system. Constructed from durable cast aluminum, it provides the structural stability required to withstand the high-stress conditions of high-speed rotation. Its three-arm design ensures balanced performance and reliability, making it an essential component for smooth laundry equipment operation.

Technical Specifications

Material	Cast Aluminum Alloy
Arm Design	3 arms
Key Features	Corrosion Resistant, Reinforced Ribs, Precision-machined Bore, High-Speed Balance

Compatibility & Application

Compatible Machinery

- Washing Machines
- Clothes Dryers

Component Role	Connects inner drum to the drive shaft
