

Washing Machine Electronic Control Board

This is an electronic control unit for washing machines. It manages the washing machine's functions, such as water intake, washing cycles, spinning, and draining.

Product Overview

Core Control Technology

This electronic control board serves as the central command unit for washing machines, orchestrating essential functions including water intake, wash cycles, spinning, and drainage. Designed for reliability and compatibility, these modules manage the complex electromechanical operations required for optimal garment cleaning. Each unit is precision-engineered to maintain consistent performance across various stages of the laundry cycle.

Compatibility & Models

Compatible Model Series

- Hitachi-59
- Hitachi-60
- Hitachi-61
- Hitachi-62
- Hitachi-63
- Hitachi-64
- Hitachi-65
- Hitachi-66
- Hitachi-67
- Hitachi-68
- Samsung-1
- Samsung-2
- Samsung-3
- Samsung-4
- Samsung-5
- Samsung-6
