

Washing Machine Electronic Control Board

This electronic control board manages washing machine functions. It controls the motor, water levels, and cycle timing.

Product Overview

Electronic Control Board Series

This versatile electronic control board is designed for high-performance washing machine management, overseeing critical functions such as motor operation, precision water level sensing, and cycle timing. Engineered with a robust mix of integrated circuits and discrete components, these boards ensure reliable performance across various wash cycles. The series covers a wide range of model variations to accommodate specific machine layouts and operational requirements.

Technical Specifications

Control Capabilities

- Motor speed and direction management
- Water level detection and monitoring
- Cycle timing and sequence execution

Component Design

Integrated Circuits • Discrete Components • Multi-pin Interface Connectors

Compatible Model Series

HITACHI-43, HITACHI-44, HITACHI-45, HITACHI-46, HITACHI-47, HITACHI-48, HITACHI-49, HITACHI-50, HITACHI-51, HITACHI-52, HITACHI-53, HITACHI-54, HITACHI-55, HITACHI-56, HITACHI-57, HITACHI-58
