

Washing Machine Main Control Board

This is a main control board for washing machines. It manages the operation of the motor, water level sensing, temperature control, and user interface display.

Product Overview

Main Control Board for Washing Machines

These professional-grade main control boards serve as the central processing unit for various washing machine models. Designed to manage critical functions including motor operations, water level sensing, temperature regulation, and user interface displays, they ensure precise appliance performance. Each board is engineered with high-quality integrated circuits, capacitors, and resistors to maintain long-term reliability in demanding domestic environments.

Compatibility

Supported Series

- SAMSUNG-39
- SAMSUNG-40
- SAMSUNG-41
- SAMSUNG-42
- SAMSUNG-43
- SAMSUNG-44
- SAMSUNG-45
- SAMSUNG-46
- SAMSUNG-47
- SAMSUNG-48
- SAMSUNG-49
- SAMSUNG-50
- SAMSUNG-51
- SAMSUNG-52
- SAMSUNG-53
- SAMSUNG-54

Technical Specifications

Core Functions

- Motor operation control
- Water level sensing
- Temperature regulation
- User interface display management

Onboard Components

Integrated Circuits, Capacitors, Resistors, Connectors
