

Washing Machine Motor

This is a motor designed for use in washing machines. It features a robust metal frame for mounting and a durable motor housing.

Product Overview

High-Performance Washing Machine Motor

This durable motor is engineered specifically for reliable operation in washing and drying machines. It features a robust metal frame for secure mounting and a long-lasting motor housing designed for professional-grade environments. Providing the essential torque and power output required for efficient cycle performance, it is a versatile component for laundry appliance maintenance.

Technical Specifications

Rated Power Output

150 W

Power Rating

Model Identifier	JM
Origin	FRANCE
