

Washing Machine Motor 60W

This 60W washing machine motor is designed for optimal performance and durability in washing and drying machinery. It features a \varnothing 10-35 shaft diameter for compatibility with various washing machine models.

Product Overview

High-Efficiency Washing Machine Motor

This 60W washing machine motor, model WJ-M902, is engineered to provide reliable performance and extended operational lifespan. Designed specifically for household washing and drying machinery, it ensures smooth and efficient cycle execution. Its robust construction makes it an ideal component for maintaining high standards in washing machine maintenance and repair.
