

Washing Machine Speed Reducer

This speed reducer is designed for use in washing machines. It efficiently reduces the motor's high-speed rotation to a lower speed suitable for the washing machine's agitation or spinning cycles.

Product Overview

Professional Grade Speed Reduction

The WJ-001-AX-40-30 speed reducer is a precision-engineered component essential for domestic and commercial washing machines. It effectively bridges the gap between high-speed motor output and the mechanical torque required for optimal agitation and spinning cycles. Designed for durability, this unit ensures smooth operation and contributes to the overall longevity of the appliance's drivetrain.

Technical Details

Model Identification	WJ-001-AX-40-30
Primary Application	Washing Machine, Agitation Cycle, Spinning Cycle

Key Features

- Robust construction for industrial durability
- High-efficiency power transmission
- Engineered for consistent and smooth operation
