

Washing Machine Timer

This mechanical timer is designed for use in washing machines, controlling the timing of various washing cycles. It provides precise and consistent timing for optimal washing results.

Product Overview

Precision Washing Control

The DXT-35SF-Q is a robust mechanical timer engineered for reliable washing machine cycle management. It offers precise control over wash, rinse, and spin operations through an intuitive rotating dial interface. Built for durability and compact integration, this timer ensures consistent cycle performance for a wide range of appliance models.

Technical Specifications

Model Identifier	DXT-35SF-Q
Operating Mechanism	Electromechanical
Motor Type	Synchronous motor

Features

Design Advantages

- Compact form factor
- Durable construction
- Easy integration
- Consistent cycle timing

Cycle Functions	Wash, Rinse, Spin
-----------------	-------------------
