

# Washing Machine Water Level Pressure Switch

This water level pressure switch is designed for use in washing machines. It accurately senses the water level within the machine, ensuring proper operation and preventing overflows.

## Product Overview

### Precision Water Level Management

This water level pressure switch is an essential component for residential and commercial washing machines, designed to ensure accurate water level sensing and system efficiency. Built with a durable plastic housing and a reinforced metal mounting bracket, it provides reliable performance and long-term durability. It is fully RoHS compliant, meeting international safety and environmental standards for electronic components in appliance manufacturing.

## Technical Specifications

Voltage Rating	6 V
Model Series	JD-01043
Compliance	RoHS

## Logistics

Standard Delivery Time	15 days
