Product Overview

High-Precision Water Level Control

This DC 5V water level sensor is designed for high-performance washing machines and dishwashers, converting water pressure signals into frequency signals for precise program control. It ensures optimal water usage and prevents overflows, maintaining the efficiency and safety of household appliances. With RoHS compliance and a robust design, it offers a reliable solution for automated liquid level management.

Technical Specifications

Operating Metrics

5 V

Rated Voltage

10 mA

Rated Current

Model Series

276 series BPS-C

Signal Conversion

Pressure signal to frequency signal

Applications

Compatible Appliances

- Washing Machines
- Dishwashers
- Household Appliances

Compliance & Quality

Certifications

RoHS, CE, VDE, CCC, CQC, ISO 9001:2000, ISO 14001:2004, REACH

Logistics & Business

Shipping Options

- Express (Samples/Small orders)
- Air Freight
- Sea Freight

Payment Terms

T/T 30% deposit, 70% before delivery

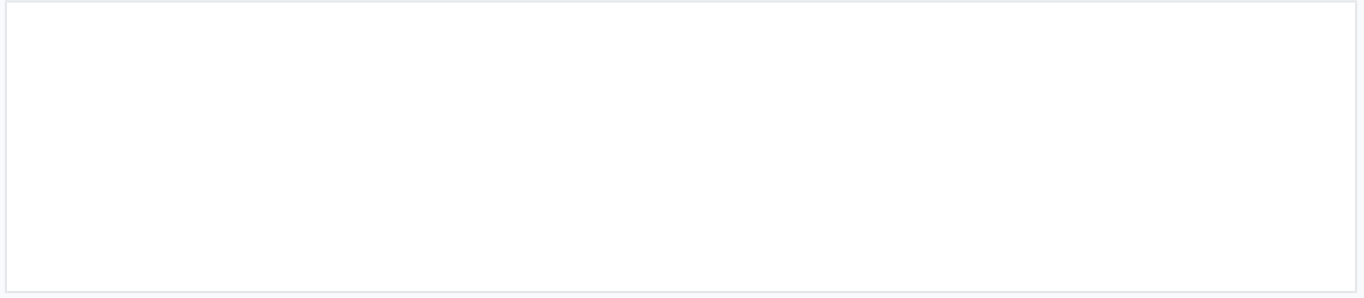

Standard Packaging

100pcs per carton; pallets used for large quantities

Typical Lead Time

15-20 workdays (depending on quantity)

Global Presence

Primary Export Markets

India • Indonesia • Thailand • Mexico • Korea • Egypt • Middle East • Latin America
